Confluence Brewing Company

In 1991, President, Co-founder, & Head Brewer John Martin started homebrewing with a high school buddy and quickly found a love for the craft. In 2012, John left his job behind and started Confluence Brewing Company and soon thereafter the demand outpaced John's ability to sell and deliver beer out of the family suburban. This led to adding a delivery driver which eventually resulted in Confluence's self-distribution model which is now an integral part of their business. Confluence has a wonderful brewery and taproom located at 1235 Thomas Beck Rd in Des Moines, Iowa if you are in the neighborhood. Cheers!!
